Create an Account in Sendgrid:

The screenshot shows the SendGrid welcome page in a web browser. The browser's address bar displays `https://app.sendgrid.com/guide`. The left sidebar contains a navigation menu with the following items: Dashboard, Email API, Marketing, Design Library, Stats, Activity, Suppressions, Settings, and Twilio SMS (marked as NEW). Below the menu, there is a 'REPUTATION' bar at 100% and a link to 'VIEW ACCOUNT USAGE'.

The main content area features a 'Welcome, Newton!' message with a sub-header: 'To get up and running quickly, please follow the steps outlined below.' Below this is a blue banner that reads 'Send your first emails with Twilio SendGrid'. The primary task is 'Create a sender identity', which includes instructions: 'Before sending email, you'll need to create a sender identity. There are two ways to do this, but we recommend creating a Single Sender to get set up quickly and test your email integration.' Two buttons are provided: 'Create a Single Sender' (in blue) and 'Authenticate a domain instead' (in light blue). To the right, a note states: 'Your sender identity is the "from" email address your recipients will see in their inbox. Learn more about this.' Below this is a diagram of an email header showing 'Your Business' as the sender and '<jane.doe@your_business.com>' as the email address.

Below the 'Create a sender identity' section is a 'Send your first email' section with a message: 'Please create a sender identity before sending your first email.' At the bottom of the page, there is a 'Remove email sending limits' section and a progress bar for 'Finish your account setup' showing '2 out of 4 completed'.
